Response

Requester:	Avis Onaga (Avis.S.Onaga@hawaii.gov)
Entity/Affiliation:	Hawaii

	Request Date: 12/08/2015	**Completion Date:** 12/22/2015

Product #:	000524-00343
Product Name:	ROUNDUP CUSTOM HERBICIDE
PC Code:	103601 Glyphosate-Isopropylammonium
OPP Team:	RM 25
Risk Managers:	Reuben Baris; Bethany Benbow (baris.reuben@epa.gov; benbow.bethany@epa.gov)
Subject:	Label Restrictions
Brief Desc:	Non-Agricultural Use Requirements box restriction to keep people and pets off treated areas not on Aquamaster Herbicide label.
Detailed Desc:	Roundup Custom for Aquatic & Terrestrial Use (ABN) and Aquamaster Herbicide (ABN) are based off the Roundup Custom Herbicide EPA stamped label. The Roundup Custom label has both agricultural and non-agricultural uses and has the Agricultural Use Requirements box and the Non-Agricultural Use Requirements box found on the EPA stamped label. The Aquamaster label only has non-agricultural uses, such as roadside spraying. But, it does not have the Non-Agricultural Use Requirements box found on the EPA stamped label that requires people and pets be kept off treated areas until sprays have dried. If a label has no agricultural uses, can both the Ag-Use box and Non-Ag box be left off the label or is the Aquamaster misbranded? Your assistance in this matter is greatly appreciated.

Response Information

Responder:	Reuben Baris (baris.reuben@epa.gov)
Response Date:	12/22/2015
Response:	I apologize for the delay responding to you question. If you have any questions about the response please contact me directly. Since the Aquamaster label only has non-ag uses, there are no uses on the label that fall under WPS, the Agricultural Use and Non-Agricultural Use boxes aren't required. Please see Chapter 10 of the LRM for details on the Agricultural Use requirements statements.
